Kimberly

I made some changes in the status document and renamed it with today's date.

Please use this version

Thanks

Thuy

Kimberly/Neil

Attached is the document with ACB inputs

Below in red are the answers to your questions

The QAO review of the rinsates are completed. I am working on the memo now, which will reflect final results for rinsates. We should be able to release the rinsates data next week. Product results are still preliminary. Do you want separate memos for rinsates and products?

Thuy

Subject: Next Week PFAS stuff

Hey Thuy,

On Tuesday, Ed would like us to join his general with Michal Tuesday afternoon to discuss the final results of the PFAS testing and the below status document. So, a couple of questions:

- Please review the document attached and please either confirm or add information where needed.
- Please let me know the status of the data QA as of COB Friday in anticipation of a release next week and a walk through with Michal on Tuesday.- QA review of rinsates samples are completed. Cover memo and spreadsheet are being updated to reflect final results for rinsates
- Please let me know the status of the method validation and Anvil data, as well as anticipated dates (I'd like to add this to the status paper). Anticipate completing method validation and QA review of product samples by 3/5/2021. Final memo should be completed nlt 3/9/2021

Thanks so much! Once I have your thoughts on the paper, I'll create a "channel" in Teams to post this for other offices (OECA, OPPT) to also add to (the 2nd chronology). I can split the papers, if that makes sense.

Many thanks,
Kimberly
